Summary

The Kentucky Annual School Immunization Survey 2013-2014 including County Profiles was released by the Kentucky Department for Public Health (KY-DPH) in July 2015 and has been posted online, [Kentucky Annual School Immunization Survey 2013-2014, FullReport.pdf](#).

KY-DPH is now releasing a Kentucky Annual School Immunization Survey 2013-2014: Supplemental Report for Public and Private Schools by County report with specific immunization profiles for each public and private school in all 120 counties in Kentucky. School officials, local health departments, medical providers, local immunization coalitions, and others can use the results in this Supplemental Report to target childhood vaccination improvement efforts. Appendices to this report have immunization profiles for both Kindergarten and Sixth Grade in each school.

Methods (See the Full Report for more details):

Annually, the Kentucky Immunization Program surveys all public and private kindergarten and sixth grades to assess the vaccination coverage rates of required school entry immunizations. Each school is required to provide aggregate totals for:

1. The number of children enrolled in each grade;
2. The current number of certificates on file;
3. Number of medical exemptions on file;
4. Number of religious exemptions on file;
5. Number of missing certificates; and
6. The number of children meeting the specific number of doses required for school age entry;
 - a. For Kindergarten:
 - i. 4 or more doses of DTaP;
 - ii. 3 or more doses of Polio;
 - iii. 3 or more doses of HepB;
 - iv. 2 or more doses of MMR; and
 - v. 2 doses of Varicella, or a history of disease.
 - b. For Sixth Grade:
 - i. 1 dose of Tdap;
 - ii. 1 dose of MCV;
 - iii. 3 or more doses of HepB, or 2 doses of adult schedule HepB;
 - iv. 2 or more doses of MMR; and
 - v. 2 doses of Varicella, or a history of the disease.

Reading the supplemental reports for school-specific vaccination information by age group

Each of these age-specific reports for both Kindergarten (Appendix A) and Sixth Grade (Appendix B) provides the aggregate totals of immunization certificate types (i.e., Current, Medical or Religious Exemptions, and Missing) and age appropriate immunizations reported for each county, as released in the County Profiles in the Kentucky Annual School Immunization Survey 2013-2014.

This Supplemental Report also lists a report for each public and private school in a county, under each of the county totals/coverage rates, with coverage rates (percentage) for each certificate type and age-appropriate vaccinations. Children having the minimum number of doses for each immunization, as reported by each school, were considered compliant.

Several objectives for Immunizations are defined by Healthy People 2020 (HP 2020), <http://www.healthypeople.gov/2020/topics-objectives/topic/immunization-and-infectious-diseases>. The attainment of age-appropriate target measure for these Objectives is used annually by the Kentucky Immunization Program to identify successful measures of vaccination compliance for school age children.

The age-appropriate HP 2020 target measures are assessed in school, as follows:

Kindergarten:

- Greater than 95% for 4+DTaP, 3+Polio, 3+HepB, 2 MMR, and 2 Varicella;

Sixth Grade:

- Greater than 95% for 3+HepB and 2 MMR,
- Greater than 90% for 2 Varicella, and
- Greater than 80% for 1 Tdap and 1 MCV
